著者:Lebovics, Dania

出版者:Firefly Books Ltd

出版时间:2007-8

装帧:HRD

isbn:9780969920373

"The same best-selling record book is now in a square-back binding that still lies flat." This year, more than 4 million babies will be born in the United States and Canada.

Each baby is special and has a unique story to tell. Baby Chronicles helps parents record and remember the story of their baby's development. It is designed to become a keepsake the family will cherish, and refer to, for years to come. The Baby Chronicles story starts at conception and continues through Baby's first milestones. This beautiful, yet practical approach to the early years comes complete with: checklists a growth chart room for sonograms a medical history page hand and foot prints a letters to Baby page a baby teeth chart a family tree and photos a sleeve for extra storage and more. The book combines flexible wiros binding with an attractive, sturdy hardcover. The binding allows the book to expand to hold cards, photos and other precious mementos. Baby Chronicles makes a wonderful gift and an everlasting keepsake for both parent and child. Previous versions of Baby Chronicles have developed a strong franchise for the book. Feedback tells us that Baby Chronicles is fulfilling a need previously unmet. To quote: "I can't wait until the day my child is old enough to appreciate this biography... I wish I could look back at a book like this of myself."
