Tommy tells the story of the First World War through the experiences of those who fought it. Using previously unseen letters, diaries, memoirs, and poetry from the years 1914-1918, Richard Holmes paints a moving picture of the generation that fought and died in the mud of Flanders. He follows men whose mental health was forever destroyed by shell shock, women who lost husbands and brothers in the same afternoon, and those who wrote at lunchtime and died before tea. Groundbreaking and critically-acclaimed, this book tells the real story of trench warfare, the strength and fallibility of the human spirit, the individuals behind an epic event, and their legacy.
