This work is packed with logistics data, tables, and operational methods for CSS at the tactical level. It includes automated logistics planning tools, complete references, glossary, and Internet directory. Now in its 4th edition, this increasingly popular guide contains the newest CSS policies, procedures, organizations, and methods for use in Army of Excellence divisions, Force XXI divisions, and interim brigade combat teams. Information and data are provided for planning and executing CSS in the attack, defense, retrograde, and during unconventional warfare and military operations other than war. It contains complete examples of orders, forms, and formats, and methods to establish, defend, and operate from a base support area.
