isbn:9781846030840

In this title, David Fletcher relates the story of the Sherman Crab Flail using rare sources and photographs. Among the first tanks ashore on D-Day, the "Crab" proved its worth

both in its mine-clearing role and as a fighting machine. This book recounts some of its more glorious moments with the famous British 79th Armoured Division and the US Army, giving a detailed exploration of the history of a powerful and innovative machine and the deadly mines it faced.
