Finances After 55 is a book for people who are already retired or who will be retiring in the next decade. This is not a "retire rich, stay rich" book. It's a practical guide that shows readers how to take what they already have saved and manage their money and assets to live a full and successful retired life. Living off savings is much different than living from paycheck to paycheck. It requires a very different kind of budget, and very different financial plan. Unfortunately, the majority of America's 35 million retired people are caught off guard when they make the switch, and financial errors at this time can be very costly.
