A sequel to the compelling novel "The Tablets of Ararat, " Najila continues the story of the independent, assertive eleventh-century Persian princess whose heart is torn between two faiths. When her father dies in a tragic accident and Najila inherits his Constantinople estate, an evil cousin tries to seize it, letting nothing stand in his way. To complicate matters, Najila is taken captive from her home and only one man knows where to find her. Will the traumatic experience finally force Najila to choose her faith . . . and the man she loves?
