Stephen Theisen divorced his wife Melissa, leaving her and their two children, Matthew eight and Alice three, with nothing but debt and anguish. Melissa is desperate to find for financial help so she storms into Seth O Reilly's office at the bank.

Seth lost his wife to cancer. He is now the single father of ten-year old twins Jessica and Laura. After hearing Melissa's story he does what he can to help her. While figuring things out Seth gets a frantic call from his daughter telling him that the other daughter is violently ill. Melissa used to be a pediatric nurse and Seth asks her to come with him. After the drama, Melissa heads home only to reappear at Seth's home several hours later offering to babysit his girls who tend to get into mischief. Melissa needs work and Seth needs help.

As time goes by they all settle into a routine and the attraction that was there from the beginning between Seth and Melissa is growing stronger. Seth is having trouble moving on since Clair's death and Melissa wants to help him even if Seth resents her for it. When Seth proposes a change in their relationship, Melissa is afraid of competing with Clair for Seth's love.

The Trouble With Twins is a lovely story about loss, grief, and finding love again. Melissa and Seth struggle to raise their children while trying to move on with their lives. Finding each other is a gift they both needed and deserved. Seth and Melissa are strong, endearing characters that I couldn't help but cheer for.
