In a world of secrets, human genius is power. And sometimes it is simply deadly...A three-hour drive from Washington, D.C., two clandestine institutions face each other across a heavily guarded river. One is the world's most unusual laboratory, whose goals and funding are a mystery. The other is an elite CIA training camp shrouded in secrecy. Now a man and a woman are about to run a gauntlet between these two puzzle factories, straight into a furious struggle to exploit a potentially world-shattering discovery--and keep some other secrets under wraps forever...Former secret service agents turned private investigators Sean King and Michelle Maxwell have seen their lives splinter around them. Michelle lies unconscious in a hospital bed after a night of suicidal violence. And Sean is forced to take on a thankless investigation into the murder of a scientist just inside the CIA's razor-wire fence near Williamsburg, Virginia. Soon he is uncovering layer after layer of disinformation that shields a stunning world filled with elite mathematics, physicists, war heroes, spies, and deadly field agents. Amid more murder, a seemingly autistic girl's extraordinary genius, and a powerful breakthrough in the realm of classified codes, Sean soon learns enough to put his life at risk. Now more than ever, he needs Michelle--at her best--to help stop a conspiracy of traitors operating in the shadow of the White House itself. From Michelle's courageous struggle to defeat her long-buried personal demons to a centuries-old secret that surfaces in the heat of action, SIMPLE GENIUS pulses with stunning, high-intensity suspense. The heroes of Split Second and Hour Game, David Baldacci's #1 New York Times bestsellers, are back--as you've never seen them before.
