"The fact that I had managed to become a health-care analyst for a U.S. Senator at the age of twenty-six still surprised me, and I lived in fear that someone would realize how ridiculous it was to have given me this authority and fire me on the spot." Idealistic, dedicated to her job, and a bit of a hypochondriac, Samantha Joyce has a very busy life. Working a seventy-hour week and mastering the details of the latest health-care reform bill, while making time to celebrate obscure but significant holidays such as the twenty-ninth anniversary of The Partridge Family series finale, leaves little time for romance. But then she meets Aaron Driver, the handsome speechwriter for a rival senator. Sammy falls for him hard, despite the fact that his ambitious boss is the emblem of everything she hates about congressional hardball. When you work on Capitol Hill, even dating becomes a political act. Try as she might, Sammy isn't the sort of person who can keep from speaking her mind, no matter how much trouble it causes. Whether she's trying to thwart a filibuster, detox a constituent, or recover from mistakenly emailing a racy message to over two hundred of Capitol Hill's political elite, Sammy stays true to herself, foibles and all. And before she knows it, she finds herself at the heart of a romantic tangle, a major showdown over health care reform, and the

highest-stakes contest of alla presidential election campaign. Kristin Gore is a keen observer of politics with a sharp ear for comedy, and her first novel is a triumph a captivating, hilarious page-turner with a loveable heroine who will charm readers on both sides of the aisle.
