In this extraordinary, long-awaited debut novel, the acclaimed essayist James Kilgo has woven a richly textured and complex tale from the threads of actual events. Set in rural South Carolina in the early twentieth century, "Daughter of My People" is the story of the ties of land, blood, and honor that bind and threaten to destroy two families. At the center of the story are two brothers, Hart and Tison Bonner, and their cousin Jennie Grant, the mixed-race woman one brother loves and the other dishonors. Theirs is a world in which dark passions lead to tragic consequences. The burden of understanding that promises redemption and victory over the destructive forces of ignorance and prejudice rests on the shoulders of Jennie. A shadowy but prominent figure in the stories passed down to Kilgo, Jennie here is given her due. Her strength and dignity, the driving forces of this novel, shine through the generations with the glow of heirloom sterling. Kilgo is a sensory writer, bringing the landscape alive with an abundance of sights, sounds, and smells. He writes with a resonance that draws the reader in and does not let go until long after the last page has been turned. "This is a love story," he says. "And I hope it breaks the reader's heart as mine was broken in the telling of it."
