After the death of his mother, Brent Hunter must take over control of the family ranch because his father, convicted of murder, must spend 10 years in jail. After discovering that the family ranch was deeply in debt, Brent sets off to take care of paying off the debt.

In an attempt to gain more money for the ranch, Brent travel to a fort in order to obtain a government contract for horses. Unable to secure the contract, Brent steps into a saloon for a drink. Once there, he hears one of the best singers, a dance-hall girl named Opal.

"Opal" a/k/a Crystal, is running. She changes her name and hair color often, in an attempt to stay ahead of the brother she believes betrayed her. After a brief meeting with Brent, she is taken by his charm, but realizes that she has to move on, she puts him from her mind.

HUNTER S MOON begins the Hunter clan story strong. Brent and Crystal s love develops well, under the artistic hand of Bobbi Smith. I look forward to the other books in the series.
