isbn:9789838120807

Lists 73 of the 109 species of lizards known from the island. The book includes an introduction, comprising a general description of the geography of Borneo and an account of its lizard fauna, and a contemporary checklist of lizards. Each species account is one page long, and includes one to three colour photos of a lizard species, plus a brief description, distribution and natural history (including microhabitat, diet and reproduction, when known).
