Book Description

“It began with simple sleeplessness. It had been almost a year since I’d found Hannah dead, and I thought I’d managed to erase all traces of that night within myself… I was wrong.”

Calamity Physics: The resulting explosion of energy, light, heartbreak, and wonder as Blue van Meer enters the elite St. Gallway School. Blue’s unusual past draws her to a charismatic group of friends (see “wild, wayward youths,” Everyman Parenting) and their captivating teacher, Hannah Schneider. A sudden drowning, a series of inexplicable events, and finally the shocking death of Hannah herself lead to a confluence of mysteries. And Blue is left to make sense of it all with only her gimlet-eyed instinct and cultural lexicon to guide her.
