装帧:Paperback

isbn:9781900877084

Synopsis

This book on key Lacanian concepts is intended to help non-psychanalytic scholars and students, as well as psychoanalysts and specialists. It presents discussions of how the concepts were created, developed and operationalised. Topics covered include "jouissance", "the subject", and "the Borromean knot". 240 pages.

Description

“An introduction to Lacanian theory and practice that is clear, sophisticated, and by all means definitive.”

—Kenneth Reinhard

Intended to help non-psychanalytic scholars and students as well as specialists, this book does not presuppose any familiarity with Lacanian theory on the part of the reader. Instead, eight crucial Lacanian ideas are explained through detailed exploration of the theoretical and practical context in which Lacan introduced them, their development throughout his works, and the questions they were designed to answer.

“By detailing the constitutive incompleteness of the Lacanian project, the contributors have guaranteed the success of their book, which will remain a major reference for a long time to come.”

—Joan Copjec
