Since its publication in 1959, *Individuals* has become a modern philosophical classic. Bold in scope and ambition, it continues to influence debates in metaphysics, philosophy of logic and language, and epistemology. Peter Strawson's most famous work, it sets out to describe nothing less than the basic subject matter of our thought. It contains Strawson's now famous argument for descriptive metaphysics and his repudiation of revisionary metaphysics, in which reality is something beyond the world of appearances. Throughout, *Individuals* advances some highly influential and controversial ideas, such as 'non-solipsistic consciousness' and the concept of a person as a 'primitive concept'

书评

一句话评论：彼得 斯特劳森的思想太深刻了，以致于他什么结论都没得出。蛋疼哲学家榜单可以排前十的，分析哲学绝不是像常人认为的bullshit，但你如果没有大师那样的神级天分，就别想在这个领域有所斩获，所以还是认识论和科学哲学比较亲。
