The impoverished Lingard family are already living in a hand-to-mouth existence, but when they are evicted from their home they face absolute destitution. Their business destroyed and without a home, there is bitterness and hatred, and in the struggle for survival the Lingards make enemies as well as friends. But their determination to survive is strong.

At first they eke out a living on the wild Yorkshire Moors, and eventually move to London. With family loyalties so strong, it begins to look as if personal happiness might be attainable for each...

Portraying life at both its best and worst, *The Long Road* is surely a must for all students of human nature.
