isbn:9780307908759

From one of our preeminent neuroscientists: a landmark reflection that spans the biological and social sciences, offering a new way of understanding the origins of life, feeling, and culture.

The Strange Order of Things is a pathbreaking investigation into homeostasis, the condition of that regulates human physiology within the range that makes possible not only the survival but also the flourishing of life. Antonio Damasio makes clear that we descend biologically, psychologically, and even socially from a long lineage that begins with single living cells; that our minds and cultures are linked by an invisible thread to the ways and means of ancient unicellular life and other primitive life-forms; and that inherent in our very chemistry is a powerful force, a striving toward life maintenance that governs life in all its guises, including the development of genes that help regulate and transmit life. In The Strange Order of Things, Damasio gives us a new way of comprehending the world and our place in it.

作者介绍:

ANTONIO DAMASIO is University Professor; David Dornsife Professor of Neuroscience, Psychology, and Philosophy; and director of the Brain and Creativity Institute at the University of Southern California. Awards he has received include the Prince of Asturias Prize in Science and Technology, the Grawemeyer Award, the Honda Prize, and the Pessoa and Signoret prizes. In 2017 he received the Freud Medal from the Royal Dutch Academy of Sciences. Damasio is a member of the National Academy of Medicine and a fellow of the American Academy of Arts and Sciences and the Bavarian Academy of Sciences. He is the author of Descartes' Error, The Feeling of What Happens, Looking for Spinoza and Self Comes to Mind, all of which have been published in translation and are taught in universities throughout the world. The Strange Order of Things will be published by Pantheon Books in February 2018.

## 评论

【听】

-----  
戏精推荐 啥玩意儿这都是

-----  
Other than homeostasis, enduring and flourishing, there's nothing left of it that I could remember. This is the first book that has fatigued me to the extent that I thought I'd enjoy the second half the book but I simple couldn't continue. This is a thesis, not a book.

## 书评

尼采会为这本错综复杂的书而掩卷欢呼，本书既科学严谨，又兼具人道关怀，而且就尼采可以评判的范围而言，本书是革命性的。作为神经科学、心理学和哲学教授的安东尼奥·达马西奥（Antonio Damasio），着手研究“我们为何以及如何感受万物、表达感受、使用感受来构建我们的自我……”
