isbn:9783598215360

A hands-on and introductory guide to the art of modern application and infrastructure monitoring and metrics. We start small and then build on what you learn to scale out to multi-site, multi-tier applications. The book is written for both developers and sysadmins. We focus on building monitored and measurable applications. We also use tools that are designed to handle the challenges of managing Cloud, containerised and distributed applications and infrastructure.

作者介绍:

James Turnbull is the author of ten technical books about open source software and a long-time member of the open source community. He is CTO at educational technology startup Empatico. He was formerly CTO at Kickstarter, VP of Services and Support at Docker, VP of Engineering at Venmo, and VP of Technical Operations Puppet.

James speaks regularly at conferences including Velocity, OSCON, Linux.conf.au, FOSDEM, OpenSourceBridge, DevOpsDays and a number of others. He is the co-chair of the Velocity conference, a past president of Linux Australia, a former committee member of Linux Victoria, was Treasurer for Linux.conf.au 2008, and serves on the program committees of Linux.conf.au and OSCON.

He likes food, wine, books, photography, and cats. He is not overly keen on long walks on the beach or holding hands.

评论

整本书都是在介绍工具使用，对于监控思想描述就前两章有一点，和书名根本不符
