While much is known about prostitution and sex-work, almost all research has been conducted among female sex-workers and their clients. Studies of men who sell sex, either to women or to other men, are much more rare. Particularly poorly understood are men's motivations for engaging in such work, the circumstances in which the sale of sex occurs, the meanings attached to the acts by both sex-worker and client, and the HIV-related risks involved.

Men Who Sell Sex remedies this major deficiency in the international literature by bringing together an authoritative collection of essays from experts in 21 countries, including the USA, Canada, the UK, the Netherlands, Morocco, India, the Philippines, Thailand, Mexico, the Dominican Republic, Brazil and Peru. It is a book which aims to demystify a taboo area, to dispel some widely held misconceptions about sex-workers and the spread of AIDS, and to contribute to better health promotion work.

Men Who Sell Sex offers a unique and compelling account of the reasons men sell sex and the pleasures and risks involved. --This text refers to an out of print or unavailable edition of this title.
