The book features 119 artists whose work appears for the first time in a Ballistic

publication. With the enormous talent in our online communities, the Exotique series will continue to document the development of character art and the world's best examples of digital character art. We've been very impressed with the quality of both the CG art and the books themselves – the entire Ballistic series has been terrific so far and we're delighted to be one of the few places in the UK to be offering these excellent art books.
