Royko's unauthorized biography of Chicago mayor Richard J. Daley was written when Daley was still in office and near the peak of his power. The revelations about Daley's political machinery, which were embarrassing and amazing, have been corroborated. But Royko describes them in his straight-talking direct style that shows how the Daley machine was part of everyday life in Chicago. Royko's anti-machine biases are evident, but do not dilute the impact.

作者介绍:

A great book by the greatest American journalist. If you want to understand Chicago, you need to read this book.
