出版者:Churchill Livingstone

出版时间:2004-12

装帧:Paperback

isbn:9780443074370

This handy resource presents material in a practical, easy to use format. The left-hand page has a synoptic and highly structured text (normally under the following headings: incidence; clinical features; differential diagnosis; management; prognosis). The right-hand page has a selection of four to six clinical photographs. Each volume also includes self-assessment material, which is extremely helpful for preparation for examinations. * Invaluable source of clinical photographs - students are now less able to have the opportunity to see - in real life - the full range of conditions that they are expected to know about and that they may be tested on * Synoptic structured text - ideal for quick preparation before ward rounds * Includes self-assessment material - picture tests - handy for revision, especially for the all-important 'OSCE'
