The fourth of the Botanica's Pocket series, this authoritative encyclopedia covers all aspects of the garden, from designing the style and structure, to propagating and caring for plants in a variety of growing environments. Supporting information,

including hardiness zones, flowering times and space requirements, is arranged by plant groups for ease of reference. Whether the gardener is tending to a lawn, ornamental grasses, bamboo, fruit and nut trees, bulbs, corms, and tubers, cacti and succulents, vegetables and herbs, climbers, creepers, orchids, ferns, palms, cycads, or any combination, this book is the authority on making it all flourish.
