著者:Uncle Fester

出版者:Festering Publications

出版时间:2006-12-10

装帧:Perfect Paperback

isbn:9780970148575

This classic now in its third edition covers all the best methods used to make LSD. The emphasis is upon natural sources of lysergic acid such as wild ergot, morning glory seeds or woodrose seeds, but extraction of ergotamine migraine medicines are also detailed. Once the lysergic acid has been procured from these sources, the text moves on to detailed descriptions of the methods used to convert lysergic acid to LSD. The text does not stop there It also gives detailed information on the chemicals used to make LSD in combination with lysergic acid, and what ordinary uses they have. The book also covers solvent management since extraction of lysergic acid from natural sources entails the use of a considerable amount of solvents. To further entertain the reader, a section is devoted to the production of TMA-2 from calamus oil, and MDMA or MDA from sassafras oil. A still further section is devoted to keeping out of trouble.
