著者:Sharon Begley

出版者:Ballantine Books

出版时间:2007-11-20

装帧:Paperback

isbn:9780345479891

In this fascinating and far-reaching book, Newsweek science writer Sharon Begley reports on how cutting-edge science and the ancient wisdom of Buddhism have come together to reveal that, contrary to popular belief, we have the power to literally change our brains by changing our minds. Recent pioneering experiments in neuroplasticity—the ability of the brain to change in response to experience—reveal that the brain is capable of altering its structure and function, and even of generating new neurons, a power we retain well into old age. The brain can adapt, heal, renew itself after trauma, compensate for disabilities, rewire itself to overcome dyslexia, and break cycles of depression and OCD. And as scientists are learning from studies performed on Buddhist monks, it is not only the outside world that can change the brain, so can the mind and, in particular, focused attention through the classic Buddhist practice of mindfulness.

With her gift for making science accessible, meaningful, and compelling, Sharon Begley illuminates a profound shift in our understanding of how the brain and the mind interact and takes us to the leading edge of a revolution in what it means to be human.

“There are two great things about this book. One is that it shows us how nothing about our brains is set in stone. The other is that it is written by Sharon Begley, one of the best science writers around. Begley is superb at framing the latest facts within the larger context of the field. . . . This is a terrific book.”

–Robert M. Sapolsky, author of *Why Zebras Don't Get Ulcers*

“Excellent . . . elegant and lucid prose . . . an open mind here will be rewarded.”

– Discover magazine

“A strong dose of hope along with a strong dose of science and Buddhist thought.”

– The San Diego Union-Tribune

书评

No repeatable experiment. Only a vague evidence about gamma wave. And what is meditation? Only Mr. Buddha knows. Such pseudo-science there. Or maybe it's just an issue with DaLai himself.
