Amongst all the elite German forces, the Green Devils distinguished themselves, from the very earliest stages of World War II, by their remarkable feats, their esprit-de-corps and by a honourable attitude toward their adversaries. This book illustrates and describes the many modern 12-inch action figures which celebrate the Fallshirmjager

in their many operations during World War II. The rich variety of their formal uniforms and field dress is also covered. This is the fourth volume in "Histoire & Collections" series documenting and illustrating collectable miniature soldiers and action figures. All the 12-inch scale figures featured are available on the open market and reproduced in full colour realistic action photographs. Target market: miniature military modellers, militaria and modern toy collectors.
