Stephanie Hoppen turns her designer's eye to this classic combination - whether it be white and creams, white and taupe, white with pink or the richness of white and gold. Arranged seasonally, Stephanie takes a look at how to use whites for a fresh Easter

celebration, a cool Summer beach room, a sophisticated Autumn-inspired orange-white living room and a sumptuous white and gold Christmas table setting. Featuring a range of locations from classic to country and urban minimal, White on White is full of interesting styling and decorating ideas. Easy and calming to live with, neutrals have been the 'colour' of the nineties interiors and, with legions of fans everywhere, the trend looks set to continue into the millennium. Whites, ever popular, are here to stay and Stephanie shows how to use them to best effect with distinctive style and panache. --This text refers to an out of print or unavailable edition of this title.
