Most people think of Steve McQueen and picture him gunning a green 1968 Ford Mustang through the streets of San Francisco. James Dean? A 1949 Mercury in Rebel Without a Cause. But what car did these stars choose to drive away from their most famous film roles? Stars and Cars is a beautifully produced volume containing stunning photographs of some of the most famous stars of the twentieth-century, with the cars they loved. With authoritative, fact-filled captions from Nick Benwell (Christie's London Consultant for Motor Cars), Stars And Cars will quite simply be one of the coolest, must-have books of the year.
