Asian living often a palette of centuries-old building techniques is becoming more and

more a by-product of dense urbanity, with high-rise apartments and large populations living close together in small spaces and Western-accented fast-paced lifestyles. The apartments presented in this dense and colorfully photographed volume represent current trends in design, which tend to draw inspiration from the past while embracing the future. From vestibules to bedrooms, lighting options to decorative accessories, the book offers visits to rounded living rooms, kitchens that have evolved from places of lonely isolation to communal spaces in the home, bedrooms as sanctuaries with breathtaking views of the city below, and such various "openings" as balconies with natural vistas and window seats overlooking the urban landscape.

很多很多年前淘到的书了，都已经出处了。在当时书中的内容还是很超前的，感觉那会看到的这些对多年后自己对室内设计的喜好和品位都有一定的影响。
