isbn:9780521798822

Chemistry 2 is a title in the new Cambridge Advanced Sciences series. It has been developed specifically for the new specifications for Advanced Level Chemistry for teaching from September 2000 and has been endorsed by OCR for use with the OCR Chemistry specification A. It contains all of the core material for the second year of

study, and covers the Advanced Level modules chains, rings and spectroscopy, and trends and patterns. In combination with other books in the series it provides full coverage of the Advanced Level specifications. Learning objectives are clearly defined, so that students know exactly what they need to learn. Self-assessment questions (with answers) and exam-style end-of-chapter exercises offer excellent opportunities for independent study. Chapter introductions and summaries provide the basis for structured revision. Full-colour illustration and student-friendly design make the science accessible to all.
