Words that children frequently see in books--high-frequency words--are the focus of this set of 18 simple, fun stories for children learning to read in English. The stories introduce and continuously review 21 high-frequency words through important

concepts such as colors, numbers, food, animals, home, and school. The repetitive language and colorful illustrations combine to help children find early success at reading in English.

This Teacher's Book provides step-by-step lesson plans for each High-Frequency READERTM, as well as Workbook instructions and Answer Key.

The High-Frequency READERSTM are available as Little Books or Lap Books. Additional components include a Workbook, an Audio CD, and a Resource Book.
