

Electrodynamics and classical theory of fields and particles

[Electrodynamics and classical theory of fields and particles_ 下载链接1](#)

著者:Asim Orhan Barut

出版者:Dover Publications

出版时间:September 1, 1980

装帧:

isbn:9780486640389

The first comprehensive treatment of relativistic electrodynamics, and still essential reading in the field, deftly revealing the classical underpinnings of modern quantum field theory. Among the topics: space-time, Lorentz transformations, conservation laws, equations of motion, Green's functions and action-at-a-distance electrodynamics.
