Overlook has brought American readers five glittering epics by Penny Vincenzi, the "doyenne of the modern blockbuster" (Glamour). Worldwide, her sales are in the millions and growing. Now, for the legions of Vincenzi readers, comes her number-one bestselling work, An Outrageous Affair , her most enthralling family saga yet. A mysterious, tragic accident in the 1950s; an inexplicable suicide twenty years later. What was the strange link between the two--and Caroline Hunterton's long-buried past? How many loved ones will Caroline's secret take down with her? Caroline's two daughters, Chloe and Fleur, have been "protected" from the truth and their deep mutual hatred their entire lives--until journalist Magnus Phillips decides to tell the story that would tear their lives apart. Moving from wartime England to fifties Hollywood, from glitzy Madison Avenue to London's theatrical aristocracy, An Outrageous Affair explores the extraordinary, sometimes fatal, consequences of truth.
