装帧:Softcover

isbn:9789874394736

The Argentinian longhorn beetle fauna has about 850 species of which 720 are illustrated in this fine book, the first of its kind. Many species are shown in several specimens to illustrate the colour variation. Also, if male and female are different, both sexes are illustrated. All specimens are shown in natural size. Many of the species covered by the book have a wide distribution in South America.
