At last, the return of one of the most influential comic artists of the last two decades Mattotti (Fires), along with long-time collaborator Kramsky, creates a spectacular adaptation of the Robert Louis Stevenson classic of horror, emphasizing it as a psychological thriller. At the height of his career, Dr. Jekyll pursues research on the duality of the soul. Secretly, he perfects a serum which he experiments with upon himself. Thus is the able to scientifically recreate the duality of the soul and bring to life, through extreme pain, the abominable Mr. Hyde. Powerless in front of the crimes committed by his alter ego, will Jekyll end up losing control of his destiny?
