出版时间:1999-02-22

装帧:Paperback

isbn:9780071346184

Here is the very first guide to SAPscript--the architecture that runs the ABAP/4 program. SAPscript is a crucial element in all external correspondence generated by SAP. The author, an experienced ABAP programmer and SAPscript trainer, provides step-by-step guidance so readers can develop custom layout sets in support of client objectives.

Progressive tutorials (basic to advanced) and real-world examples help SAP R/3 implementers achieve mastery of this essential area.
