Nevada has long been a place of endless mystery, irony and flat-out wonderment for those who have taken time to experience it. It's easily the most eccentric, interesting, and misunderstood state in the union. Moreno and Prosser have probed every hidden

region of Nevada to find and chronicle the lives and visages of Nevadas gone and Nevadas present. They find beauty not in a desolate landscape but in hues so subtle that they are often overlooked. They find man's presence in ways that reveal how temporal it is. They unfold the story of Nevada with color, depth, and literary precision.
