出版者:INBio

出版时间:2007

装帧:Paperback

isbn:9789968927253

This field guide represents the first in-depth book ever written about this group of amazing little frogs. The first part presents general information about glass frogs and the characteristics of the family Centrolenidae. In this section, you will find information on family history, behavior and ecology of Costa Rican centrolenids, including aspects such as habitat, activity, feeding, reproduction, and embryonic and larval development.

The second part contains a detailed description of the 13 Costa Rican glass frog species. It includes information on their morphological features, similar species, sex determination, geographical distribution, natural history, call, egg masses, larvae and reproduction.

Language: Bilingual in Spanish and English.
