The advances made by modern Spanish architecture from the 1940s, when it lay in silence and obscurity, to the 1990s, when it received worldwide acclaim, is a dramatic story, probably the most remarkable case of postwar architectural progress in Europe. This definitive critical study of postwar Spanish architecture looks at the works, projects, trends, landmarks, architects, and engineers of the period. It is both a descriptive history and a new critical evaluation by one of Spain's most important architectural critics and historians.* Not for sale in Italy, Spain, and Central and South America

西班牙的现代建筑史；

少有的关于西班牙当代建筑历史的全景式的展示。书中基本上全面展现西班牙建筑在20世纪的后50年里如何从风格的个人探索到全面的辉煌的过程。然而就像是大多数的西班牙建筑一样——精彩却又略显保守，全书虽然案例丰富，整体的主题却显得有些模糊和中庸。
