A story of marital breakdown seen through the eyes of teenage Daniel. When Daniel's family return to America from Italy he, being Jewish and speaking Italian seems not to fit anywhere. The story captures those years when the more you find out about the frailty of love the less you want to grow up.

## 评论

I find it a little trivial and boring to complete reading this book. But the quality and emotion from the every role in this book are so moving and touching. The choices they make always arouse my reflection about my own decision, my own attitude towards those life challenges. In a word, this book is so educational.
