Over the last few years, architects from around the world are discovering China as the perfect place to develop their architecture. By contrast to the restrictions and limitations of European and American cities, Shanghai, with its seemingly boundless possibilities, represents a bold new opportunity for architecture and urbanism. Shanghai, with the upcoming 2010 World Expo, is immersed in a deep physical transformation, reconsidering the relationships within the city as well as surrounding neighborhoods, and investing in buildings with national and international signatures. Shanghai Transforming examines this transformation, focusing on a widely diverse aspects including history, natural and artificial resources, economy, society, and public

perception. Graphics and data, along with photographs, and maps, provide the reader with a rich resource from which to understand and appreciate this complex process.

评论

用很数学的方法研究，很有科学的态度

现在出书好简单（算了人家也是时间前的书了），一些照片出奇的有年代感（不过也就十年而已）
