著者:Bertha Davis

出版者:Franklin Watts

出版时间:Mar-90

装帧:简装

isbn:9780531109175

From School Library Journal An excellent, much-needed book. Davis has included nearly every facet of the problems associated with our country's housing problem, from redlining neighborhoods to mainstreaming of the mentally ill, and she addresses causes and effects that help answer many questions of even informed readers. The processes through which our housing crisis has developed are all definitively indicted. Yet nearly one-third of the book examines the history of solutions and the prospects for more creative possibilities. Davis's book makes a superb partner for Kosof's Homeless in America (Watts, 1988). It is recommended for libraries supporting social-studies curricula and for metropolitan public libraries. --Catherine vanSonnenberg, San Diego Public Library, CA Copyright 1990 Reed Business Information, Inc. Card catalog description Surveys the topic of housing in modern America, examining such aspects as the low-income rental housing crisis, public housing, and the question of renting versus buying a home."
