When your child was a baby you took him to have him immunized for childhood illness but you knew they would have to cope with far more serious threats in life than there are other threats as painful and destructive to a child's growth as physical illness: Separation, a death in the family, a new baby, fears of his own imagining that hurt as much as pain. These Open Family Books are to help adults prepare children for common hurts of childhood. Caring adults try to protect their child from difficult events. But still that child has ears that overhear and read the faces of adults around him. If people are angry, he knows it. If people are worried, he knows it. If people are sad, he knows it.

knows that too.
What he doesn't know-if no one tells him-isth
