>to Codex: Chaos Space Marines
This tome has but one purpose: to teach
you
the mysteries of collectingi¼CE painting
and gaming with a Chaos Space
Marine
army in Warhammer 40i¼CE000. For some of
you this path leads to
untold power and
infamyi¼CE for others it holds nothing but
endless
damnation. Only your own
prowess and the fickle favour of your
Chaos god
will determine which of these
fates will be yours...
CHAOS
SPACE
MARINES
Ten thousand years ago the Imperium
was racked by a terrible civil
war called
the Horus Heresy. The rebellion was led
by Warmaster Horusi¼CE
the most trusted of
the Emperor's Primarchsi¼CE who had been
led to believe
by the Chaos gods that it
was heii¼CE not the Emperori¼CE who should be
the
leader of Humanity. Almost half of the
Space Marine Legions of that time sided

>with Horusi¼CE plunging the Imperium into a
terrible galaxy-wide war from which
it has
never fully recovered. The war ended with
the death of Horus at the
hands of the
Emperori¼CE but the Emperor himself was
mortally wounded
and is now only barely
kept alive by a life-support unit called the
Golden
Throne. With the defeat of Horusi¼CE
the surviving Space Marines that had

>followed him fled to the Eye of Terror - the
greatest warp storm in the galaxy.
The
Chaos Space Marines of the Traitor
Legionsi¼CE as they are now

called it lurk there to this day consumed by their hatred of the Emperor the Imperium and all Mankind. Twisted by continual contact with the Chaos gods Chaos Space Marines have become a terrible canker that eats at the heart of the imperium and they might one day have their revenge... WHY COLLECT A CHAOS SPACE MARINE ARMY? A Chaos Space Marine army is very similar to a normal Space Marine army: the bulk of its troops are elite and very tough they wear excellent armour and are armed with a variety of devastating weaponry. The only real weakness of a Chaos Space Marine compared to his Imperial counterpart is that he has a (very sensible) desire to preserve his own skin and therefore does not benefit from the And They Shall Know No Fear rule that prevents loyal Space Marines from running away. On the other hand a Chaos Space Marine army has access to an assortment of unique troop types not available to any other army. The most obvious of these are the myriad forms of Daemon that a Chaos Space Marine army can summon to help defeat their enemies. As Daemons must be kept in reserve their points value is rather lower than their abilities would suggest and they make excellent assault troops with which to back up a Chaos Space Marine force. In addition to Daemons there is a wide variety of Chaos Space Marines who follow weird and exotic cults and have exotic abilities to match. Examples of these include Khorne Berserkers Plague Marines and Noise Marines amongst many others.

The book is about how a minor error can have major consequences. I don't want my children to commit the worst error of pulling a person from his background and judging him by their standard; it is of no more real value than of putting a raven in a coal miner. Small misunderstanding within a certain range is acceptable; it is often a prod to insights.
