I can't believe how awesome Zion National Park is! We just got here 4 hours
morning after a 5-hour drive from the Las Vegas airport. I read about
Zion if you have an old-fashioned national park. It is located in the
corner of the state on the edge of the Colorado Plateau. According to
my guidebook, many Native Americans lived here many years ago. The
Pueblo and Paiute lived here many years ago. The first people in the
area were Mormon pioneers named Nathaniel Johnson in 1848. He was
a Brigham Young leader of the Mormon church. He found a place
for a new settlement. The place was called the area Zion, which
meant "heavenly place".
