Book Description Color is a crucial component of every scrapbook page, yet few scrapbookers possess a true understanding of how to select a color scheme and what makes it visually appealing. There is in fact a creative science behind successful color choices and now scrapbookers of every level can acquire the know-how previously limited to those with a formal art background. Comprised entirely of artwork created by the 2005 Memory Makers Masters--10 of the top scrapbook artists in the industry--this book demonstrates how to put together fail-proof color combinations in an easy-to-understand way.
