著者:Thomas McGuire

出版者:Amsco School Pubns Inc

出版时间:1990-06

装帧:Paperback

isbn:9780877201533

The books of this series--Reviewing Biology, Reviewing Chemistry, Reviewing Earth Science, and Reviewing Physics--offer an innovative format that comprehensively reviews and supplements the study of science as it is usually taught at the high school level. Each book is readily correlated with the standard textbooks for this level. The series is specifically geared to the needs of students who want to refresh their memory and review the material in preparation for final exams.

Reviewing Earth Science contains a review of the one-year introductory earth science course for college-bound students. The material is divided into fourteen topics, each of which is divided into major subtopic sections. The book is abundantly illustrated with clearly labeled drawings and diagrams that illuminate and reinforce the subject matter. Important science terms are boldfaced and are defined in the text. Other terms that may be unfamiliar to students are italicized for emphasis. In addition, the large work-text format makes Reviewing Earth Science easy for students to read.
