"Unfortunately, there are still many unanswered questions regarding a whole wave of assassinations which altered the course of the history of this country. I was in the motorcade when President Kennedy was killed and I'll never forget it. No lone nut assassin killed him, either. It is my hope that the research of people such as

Mr. Livingstone and Mr. Groden can help us determine what resulted in the first of a series of violent events which had far reaching effects on the American government. ~
- Congressman Henry Gonzalez,
former Chairman of the House Select Committee on Assassinations.
