Set among Irish-Americans living in a blue-collar community just outside Boston during the 1960s, *The Playhouse* is a bittersweet story about ordinary lives and about one woman's coming of age. The story opens

as young Maureen Mullen accepts employment as a nurse in the home of Charlie O Clair, a successful, politically ambitious lawyer in his forties who is unaware that he has incurable cancer. Maureen, an orphan who was raised by her grandmother, is unexpectedly affected by her contact with this strange man who sustains himself in his waning days by having her read Thucydides aloud to him. They become lovers.
