This rich compilation of Yiddish folksongs contains the texts of over five hundred songs in transliterated Yiddish and in English translation, with music for fifty-four, as well as extensive comments on their origin, meaning, and background. Together, they afford a fascinating view of life in the now-vanished Jewish communities of Eastern Europe, of the migrations to America and Israel, and of

the horrors of pogroms and concentration camps. There are chapters on cradle songs, children s songs, love and courtship songs, wedding songs, songs dealing with religious beliefs, street and underworld songs, humorous and dance songs, Chasidic songs, songs of class struggle, and finally, songs deriving from the ghettos and death camps of Nazi-occupied Europe. They are all "voices of a people"--a people that has expressed its deepest feelings and thoughts through song.
